

WITH THE District Agriculturist

By J. S. Duncan

Profit in Livestock

A lot of the grain is not a very good grade this year and so its cash value is reduced. Feeding trials have shown that low grade grain is practically as good as high grade from a feed standpoint. This fact is important as the prices of both cattle and hogs are good now.

The profit in hogs can be increased by raising high grading bacon type animals. There is no secret to good pigs, the right type of breeding stock and marketing at correct weight gives the desired result. The side effect is being able to dispose of a lot of grain at a very nice price.

Care of the Fruit Garden

Now is the time to prune out all dead wood in the raspberries, currants and gooseberries. All wood which is past bearing should be removed every fall to keep the growth easy to manage. To cover the plants with straw a little later can also help to prevent winter killing. In the case of raspberries the practice of burying the tips of the canes is very good also. The straw berry patch can be covered with straw. A days work now can mean more and better fruit next year.

Livestock Improvement

The Dept. of Agriculture has assistance policies for farmers raising commercial cattle, sheep and swine. The policies consist of selecting purebred sires and paying a portion of the cost of the animal and paying the shipping charges. There is a fair chance of getting real value in a new bull, boar or ram now than there will be next spring. Full information regarding these assistance policies is available from my office.

Trees For 1957 Planting

There are still some trees available for next spring's planting. Quantities are limited so anyone wishing to get trees must get their application in right away. The following trees are still available, Caragana, Green Ash, Manitoba Maple, Lodge pole pine, Scotch pine, Larch, Poplar and Willow. Application forms are available at my office.

The Afternoon Group of the W.A. will meet in the church parlor on October 11. There will be no bake sale October 20 but we will be seeing you at the bake sale at the bazaar on Oct. 27.

MONDAY, OCT. 8 THANKSGIVING DAY

Monday, October 8, has been designated as Thanksgiving Day in Canada. All business places will be closed all day.

Weekly Inspirational Corner

(Sponsored by an Irma Times reader)

But this I say, He which soweth sparingly shall reap also sparingly; and he that soweth bountifully shall reap also bountifully.

Every man according as he purposeth in his heart, so let him give; not grudgingly, or of necessity: for God loveth a cheerful giver.

And God is able to make all grace abound toward you; that ye always having all sufficiency in all things may abound to every good work.

Being enriched in every thing to all bountifulsness which causeth through us thanksgiving unto God. 11 Cor. 9: 6, 7, 8, 11.

M.D. Wainwright Council Meeting

The council of the MD of Wainwright No. 61 met in the Council room of the MD of Wainwright at Wainwright on Thursday, September 13, 1956.

Councillors Dallyn, Castle, Garrioch, Patterson, Plaxton and Archibald present; also Dr. H. G. Folskins, trustee of the Wainwright School Div. No. 32.

Reeve Archibald in the chair. Patterson—that the Minutes of August 8, 1956 be accepted as written. Cd.

Garrioch—that Clr. Dallyn be Deputy Reeve for the next six months. Cd.

Finance

Garrioch—that the accounts recommended by the Finance Committee and subsequent accounts presented be passed and paid. Cd.

Plaxton—that the Reeve be a Committee re of Killam Construction account receivable of \$1,018.75 and Frink snow plough and report his findings at the next meeting. Cd.

Archibald—that Clr. Dallyn meet the Chauvin Village Council re to grading done by Mun. 12A Grader, 8th, 10th, 11th Oct. 1956. Cd.

The Secretary reported that no appointment had been made to succeed H. V. Harvey, Assistant to the Sec. Treas. resigned, that the office staff would continue as it is until Jan. 1, 1957.

Plaxton—that a Court of Revision for the 1956 Annual Assessment be held at the Municipal Office Thursday, Oct. 11, 1956 at 2 p.m. That Clrs. Dallyn, Castle, Garrioch, Patterson and Archibald shall constitute the Court. Cd.

Representation from the Wainwright Club Labor Progressive Party presented a brief re to Municipal Finance and the Provincial Treasurer's Tax proposals. The Reeve thanked this Committee on behalf of the Council.

Correspondence from the Director Communal Property Act to FWA Local 723 Roras read re new Hutterite colonies and ordered filed.

Garrioch—that this Council request the Council of the Town of Wainwright to arrange parking facilities on 2nd Ave. West being at the front of the Municipal Office for Municipal ratepayers during MD hours. Cd.

Relief Grants and Health

Archibald—that letters of thanks be extended to F. E. McLeod and Co. for their forethought in advising the MD of this probable re-imbursement and to the Public Trustee for the amount of \$191.00 funeral expenses in full re 37059 Oscar Anderson.

Agriculture Service Board

Castle—that the oral report of the Field Supervisor be accepted as given and recommendations approved. Cd.

Public Works

Patterson—that the resignation of S. C. Murray, motor grader operator, account of ill health, be accepted with regrets, that the Secretary proceed to pay holiday pay and arrange payment of Pension contribution. Cd.

Application for an approach into the S12 15-44-6 referred to Clr. concerned.

Correspondence from Mrs. G. U. Carpenter re to improvement of road condition to Sec. 21-45-2 road as discussed at Div. 1. Secretary instructed to collect snow plough account \$6 contracted by Mrs. Carpenter Feb. 18, 1956.

A. E. Rogers request for compensation area taken for roadway NE 20-4-6 as discussed at March 1955 meeting referred to Clr. Patterson.

Dallyn—that the letter from the Dept. of Municipal Affairs re fencing of road allowance between 12 and 12-42-1-4 be read be received, that if the Dept. will advise the name of the party complaining this party will be contacted to see just what the trouble is. Cd.

Dallyn—that damage to fence SE 1-4-6 when snow ploughing in 1956 to an amount of \$10.00

Celebrate Silver Wedding Anniversary

On Saturday evening, Sept. 30, Mr. and Mrs. R. O. Larson were completely taken by surprise when between fifty and sixty relatives and friends arrived at their home about 8:30 p.m. to help them celebrate their silver wedding anniversary.

Mr. and Mrs. Larson (nee Bessie H. Scott) were married at a quiet ceremony in Wainwright United Church manse by Rev. W. Huston on October 3, 1931. Mrs. D. Faulkner (nee Harriett McFarlane) was bridesmaid and Haakon Larson was best man.

A happy evening was spent with music, dancing and chatting. A delicious lunch was served buffet style from a table laid with a white linen cloth centred by a tiered cake, made by Mrs. Charlie Archibald, and flanked by white tapers in silver candlesticks.

Jean and Scott Larson presented their parents with a beautiful chiming mantle clock and their mother with a bouquet of carnations. On behalf of the guests, Mrs. J. C. McLean in her usual witty manner, reminisced on earlier days, then presented Mr. and Mrs. Larson with a substantial purse. Mr. and Mrs. J. D. Elliott and Mr. and Mrs. J. C. Stuehmer gave a lovely wool car robe. Mrs. McLean entertained with a humorous reading entitled "Bessie's Boil." This was greatly enjoyed by all including Bessie.

Following these presentations, dancing was resumed and the guests left in the wee sma hours after wishing Rick and Bessie many more happy anniversaries.

Celebrate 35th Anniversary

Congratulations and best wishes to Mr. and Mrs. R. C. McFarland who celebrated their 35th wedding anniversary on Friday last.

A family supper was enjoyed at the home of Mr. and Mrs. R. A. McFarland. Later in the evening a surprise was held for Mr. and Mrs. McFarland at their own home. A group of old friends made up the party and a jolly evening was spent with music and friendly talk. Mr. D. H. Gunn proposed the toast to the bride and groom and Mr. H. L. Black, on behalf of the gathering, presented Mr. and Mrs. McFarland with a tri light.

Irma folk wish them many more happy anniversaries.

Card of Thanks

We would like to take this opportunity to thank all of those who helped to make our silver wedding anniversary such a happy occasion. Your gifts, cards and good wishes are greatly appreciated. Sincerely, Bessie and Rick Larson.

be paid to R. W. Valteau. Cd.

Castle—that the Dept. of Municipal Affairs be advised that the Clr. concerned will take up the matter in hope that a road be made available to the NE 26-45-1-4 J. T. Buck Cd.

Archibald—that C. Reed be engaged as a Motor Grader Operator at a rate of pay of \$12.25 per hour. Cd.

Secretary advised that a cheque for \$4500.00 had been received from the Dept. of National Defence ex gratia payment in settlement of all claims arising out of the operation of Wainwright Military Camp during the years proceeding the calendar year 1956 on Municipal roads.

Archibald—that application be made to the Dept. of Highways to have certain changes made to the Articles of Agreement 1956 Road Grant as presented by Clr. Patterson. Cd.

Castle—Adjourn. Cd.

Glen-Coa Gleanings

The sympathy of all is extended to Mrs. Nilson, Erling and Lily (Mrs. R. Erickson) in their recent bereavement, also to a sister Bertha, a brother Peter, and other relatives.

Mr. Nilson will be greatly missed in our community. He was a leader in Sharon Lutheran Church activities, and a friend to everyone.

Those attending the funeral service for Mr. Nilson on Tuesday, Oct. 2 from outside points were: Mr. Sigurd Fluevog of Vancouver; Mr. and Mrs. Lloyd Erickson, Miss Evelyn Erickson and Mrs. A. Lindquist of Edmonton; Mr. L. Hovne, teacher at C.L.C., Mrs. E. M. Berg, matron of the Lutheran Sunset Home, and Gordon Hollinger of Camrose; the Rev. J. S. Stolee of Bawlf, acting president of C.L.C., brought a tribute in memory of Mr. Nilson's interests in behalf of C.L.C. and the Sunset Home.

The harvesting is being done whenever weather permits. A week of fine weather would certainly be appreciated.

CHURCH SERVICES

THE ALLIANCE CHURCH

Sunday a.m.
10:30—Sunday School.
11:30—Communion Service.
Tuesday p.m.
Prayer meeting.
—L. D. Sheardown, Pastor.

ST. MARY'S CHURCH NOTES

Owing to unforeseen circumstances we will not be able to have a service in St. Mary's church on October 7. The next service will be a Celebration of Holy Communion on Sunday, October 21 at 2 p.m. Our congregation and friends are cordially invited to attend the Harvest Festival Service at Metropolitan school on Sunday, Oct. 7 at 4 p.m.

ST. GEORGE'S MISSION

Harvest Thanksgiving Service will be held in the Metropolitan School on Sunday, October 7 at 4 p.m. A cordial invitation is extended to all our friends to worship with us.

Jarrow News

Mr. and Mrs. D. Gibbs and family of Edmonton spent the week-end at the home of her sister, Mrs. B. Black.

Mr. and Mrs. J. B. Campbell and Mr. and Mrs. M. Tressman visited at the G. Bridgeman and J. M. Holt homes on Sunday. H. McGuire had the misfortune to break his arm while operating a hay baler. At present he is in the Viking hospital but we hope to see him about soon.

Mr. and Mrs. Phil Holt and family of Vegreville spent the last week in the Batt district. Mr. and Mrs. Otis Harris are visiting at the home of her parents, Mr. and Mrs. A. Overby. They are enroute to Alaska where Mr. Harris is being posted.

Echo-Rodino

Farm Bee Held For N. Hollar

Nine close friends got together Sunday morning to finish stocking for Norman Hollar who injured his left arm recently. A cool morning and many good hands, the job was completed by noon. Mesdames A. Crouse, A. Beckett, B. Simmonds helped Mrs. N. Hollar serve a hot meal to the hungry men. Mrs. Philip Johnston has been a patient in Viking hospital. Mrs. Henry Vandervaele and children were in Camrose Tuesday.

Glodie Hunter has been visiting her pal, Gladys Faulkner. Sheila Crouse spent a night with Patsy Ramsay of Mannville.

Henry Beckett has left to take up with his crew at Paradise Hill, Sask. after being home 8 days from the north.

Northern Nuggets

The Albert Busy Beavers W.I. Girls' Club October meeting was held at the home of Miss Laverne Larson on Monday afternoon, October 1. It was a very busy meeting, planning for their own table at the W.I. bazaar on November 17. Plans were also made for a Halloween party and don't be surprised if the girls come asking you to "shell out for UNICEF" on October 31. Yvonne Blanchard won the contest conducted by Doreen Allen. A delicious lunch was served by the hostesses Yvonne Blanchard and Ruth Allen.

Mr. Jack Dubasz has returned to Edmonton to continue his studies at the University.

Miss Irene Myers of Calgary spent her two weeks holiday assisting with the harvest work on the farm of her parents, Mr. and Mrs. E. Myers.

Mrs. Margaret Rutherford has been enjoying a visit with her sister, Mrs. L. Savage and family. When she left for her home in Quebec, she was accompanied by her niece Marie, who will spend a year in the east.

NEW DELHI BEMUSED BY LEFTOVER STATUES

India is trying to decide what to do with hundreds of statues of British kings, generals, and administrators, and other reminders of British rule which dot the country.

Since this country gained its independence, many Indians have been asking for the removal of these statues.

The government, while echoing the sentiments of the public, has yet to take a final decision. They are still undecided whether to retain the statues and monuments in their present places or to remove them to museums.

There are, however, some Indians who want the statues to remain where they are.

"We are a mature nation and we should not be over-sensitive," they say. "After all, these statues are part of India's history."

The Ministry of Education, which is in charge of the monuments and statues, has asked the state governments for their views on the final disposal. Several state governments have expressed differing views in their replies.

Madras has replied that they would like some of the British statues, in the state to be removed

while preserving others in their present places.

Explaining the state's view, C. Subramaniam, the State Finance Minister, told the Madras legislative assembly that the statues would serve as "useful reminders of India's former political slavery," and should be preserved "lest India should slip again into slavery."

Andhra state, on the other hand, has suggested that the statues should not be disturbed at all.

Uttar Pradesh, the biggest state in India, is of the view that Commonwealth sentiment should be taken into consideration while taking any step to remove relics of British rule from the country.

As soon as the views of all the states are in, the Education Ministry is expected to formulate a policy.

A section of the Indian press has been campaigning sporadically for some time to remove all the British statues from parks and other public places.

To remove all the statues and memorials of British rule would create wide gaps in parks, public gardens, government offices, and buildings all over the country.

In Calcutta, the vast central park called the Maidan has more than a dozen statues of British generals and administrators—Mayo Harding, Peel, Canning, John Lawrence, to mention a few.

In New Delhi, the marble statue of King George V still stands at the entrance to Kingway, the two-mile avenue leading to the residence of Indian President Prasad, although the avenue now is called Raj Path or State Avenue.

The statue of King Edward VII stands near the Red Fort, dominating one of the most frequented parks in the old city. The statue of Lord Roberts, one-time commander-in-chief of the Indian Army, stands before the residence of Prime Minister Jawaharlal Nehru, who has taken over the official residence of the commander in chief.

If India decides to remove these statues, the gaps left by them would have to be filled by pieces of Indian sculpture.

The statues of King George V and Queen Mary, which stood in the facade of the President's house, have been boarded up and flower pots now stand on the lawn. They will be moved to the National Museum now under construction in New Delhi.

People's vote will set tone

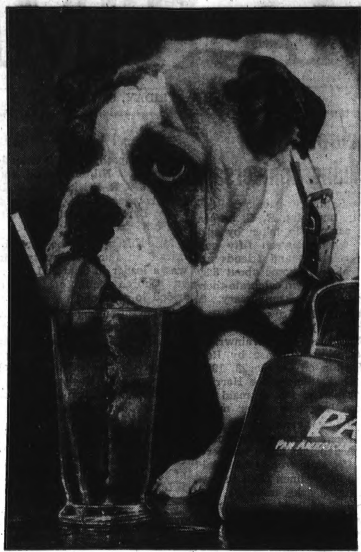

The chairman of the committee on Alcohol Education, R. N. Halstead, says he believes the success or failure of the Liquor Act will depend on whether voters face the responsibility of deciding how much liquor is good for their community in a mature way.

Mr. Halstead was speaking recently to an audience assembled for Ladies' Night at the St. James Chamber of Commerce. He pointed out that the variety of backgrounds, drinking habits and attitudes toward drink in the province as well as the distribution of population make a uniform control system impractical.

"Local Option provisions enable every community to take a good look at itself and to decide in terms of its population, location, economy and habits, what system of outlets will best suit it."

"Once a system has been established by the majority of voters, responsibility returns to the individual," Mr. Halstead reminded his audience that one of the reasons the old act was changed was because normally law-abiding citizens could not respect it.

"The new pattern which will be established, however, should represent the best thoughts of each community. Then citizens will be obliged to abide by the law and to co-operate with police in enforcing it."

TONGUE-HEAD—"Beaucare," a five-month-old bulldog, found New York's heat too much for him after arriving from London. As better an English thoroughbred, he disdained water and found relief in a glass of iced tea.

"Centre for victory"

The great advance in the work of the Canadian National Institute for the Blind during the past few years has been reflected in the new, modern buildings which have been erected, to provide the facilities needed for the work of the organization.

Visitors are always welcome at the Institute, and each and every reader is invited to call. Let us give you a brief word picture of the Residence and Service Centre in Regina, one of the most recently-completed buildings.

On the ground floor, you would see the blind guests coming down for meals in the big, sunny dining room, from their cozy, comfortable private rooms upstairs, and in the evening gathering for cocon, and perhaps for an entertainment by some group of friends, in the comfortable lounge, all under the care and direction of the kindly matron and her staff. The guests are blind people from all parts of Southern Saskatchewan.

Just down the hall you would enter the large room where the Home Teacher, herself blind, gives instruction in Braille reading, typing, and handicraft, helping her pupils to happier, fuller living. This room, rings with chat and laughter when the "Handicraft" Class meets, for instruction and sociability.

The hall leads now past the Board Room, where the programme and plans of the C.N.I.B. are directed by a volunteer Advisory Board, of public-minded citizens, under the chairmanship of Hon. Chief Justice W. M. Martin, and enters the auditorium, where every sightless person within "coming distance" is welcome to the social activities for the district, dancing, cribbage, entertainment, etc.

But we come now to the administrative offices, the nerve-centre of all these activities. You would be greeted by a receptionist registered as blind, and were you a sightless person needing advice and help, you would have the privilege and benefit of talking things over with an Executive Officer or a Field and Social Worker, both blind, and knowing the problems of the sightless at first hand. These problems are as many and as varied as there are people who call; with regard to economic needs; and employment to fill the great desire for human independence; about "something to do" in sightlessness; about problems as close to the heart as the guidance and training of a blind child; nothing in the life of a sightless

person is regarded as insignificant. In these interviews have been taken the first steps toward training and employment. From them have come trainees for field service work, home teaching, dictaphone operation; dark-room developing; garment-making; canteen operation; and practical help has been given to a number already engaged in farming, private business, home-making, and so on.

The activities of the Home Teacher and of the Field Secretary go out to the sightless people of Southern Saskatchewan from this building, and from here too are administered all the other services of the Institute. To this centre also come the blind from the rural areas for rehabilitative training.

Though this picture is of the Centre in Regina, which from an empty, uncompleted building a year ago has come to full and active life, the same could be said of the parallel Centre in Saskatoon, and of those in other provinces. Whether the call means only a welcoming word and a brief chat or consultation on a major human need, the Institute works always on behalf of our sightless citizens, and it looks with confidence to its sighted friends to supply the funds to keep it always ready.

During the period September 15 to October 15, volunteer canvassers will be at work in Saskatchewan. Make your contribution to your local canvasser or send it to the Canadian National Institute for the Blind, at 2550 Broad Street, Regina, or at 216 Fourth Avenue N., Saskatoon.

LOSE A MINUTE—SAVE A LIFE

Air view of the open-pit mine and new asbestos mill.

Supply world with asbestos-- will do so for another 100 years

By LEE HANCOCK

On the edge of a yawning, mile-wide hole, is the town of Asbestos. There is nothing obscure about the name of the town.

It is so named because it is built around the world's largest and most productive asbestos mine. The mile-wide hole is the huge, open-pit Jeffrey mine, out of which asbestos has been taken since 1881.

The pit is worked very little these days. Today the open-quarry method of mining asbestos is not considered efficient, and instead the miners go underground.

The modern asbestos mill, which is the focal point of the town, was opened formally a scant two years ago. It replaced several outmoded mills, cost some \$20,000,000, and is a source of pride to the town's 10,000 inhabitants.

The working male population of Asbestos daily pours into some 30 miles of tunnels. The object of their labor is a serpentine-veined, green-gold rock which is both a fibre and a mineral. The veins contain fibres of asbestos. The thicker the veins, the longer, and more valuable, the fibre.

Depending on the length of the fibre, asbestos sells for anywhere from \$1,200 a ton for the top grade to \$35 a ton for the shortest lengths.

The separation of asbestos fibre from its ore is done by mechanical means. The chrysotile rock is crushed repeatedly, and after each crushing the fibres are removed by air suction.

The basic principle behind the recovery of asbestos never has changed, but the amount of production has. Back in the early days of asbestos mining a hard working boy sometimes could pick enough asbestos out of the rock to fill as many as 12 bags each day.

Today, instead of the laborious hand chisel, miners use dynamite. The ore is loaded by electric shovel and hauled in 22½-ton diesel trucks. Current production from the pit ranges from 4,000 to 6,000 tons per day. The people of Asbestos are supplying more than a third of the free world's requirements of the strategic stuff.

Primarily, asbestos is famous for its resistance to heat. That property, in addition to making it a freak of nature, also has caused it to be one of the world's more important minerals.

Wherever modern machinery runs into the problems caused by heat and friction, and that's just about everywhere, asbestos is needed. It is, for example, the essential ingredient in auto clutches and brakes. Jet engines were made possible by asbestos. It is used in guided missiles. Its biggest use, of course, is in shingles and other building materials.

Scientists still are trying to figure out a way to make synthetic asbestos, haven't even come close.

The United States imports 80 percent of its asbestos needs from Canada. Besides Canada, the only other major user of asbestos to have an adequate supply within its borders is Russia.

The busy little French-Canadian town of Asbestos is only about 60 miles north of Vermont. Part of the Quebec deposit extends into northern Vermont, where one firm, the only major producer of as-

bestos in the U.S., maintains a mine.

The Asbestos company figures that the town of Asbestos is good for another 100-productive years. They're currently planning to fill up the huge hole which is the now almost obsolete open-pit mine. It will be quite a project, as at one point the mile-wide hole is 450 feet deep.

Since the days when the Greeks made wicks of it to burn oil at the feet of the goddess Athena, asbestos has come a long way.

"This uses for it continue to grow. Everybody in some way or another is served by asbestos. Even the movie moguls of Hollywood use it as "snow" in winter scenes.

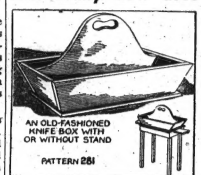

AN OLD CUSTOM

The custom of monarchs aping of themselves as "we" is the throwback to the days when there were two Roman emperors, one in Italy and one in Constantinople, who issued decrees under their joint authority, using the plural "we."

The first philosopher of record was an Egyptian, Ptahhotep, who was governor of Memphis in 2800 B.C.

IN THE HOME WORKSHOP

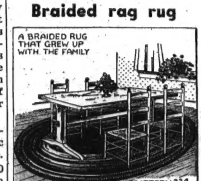

Has many new uses

AN OLD-FASHIONED NEW BOX WITH OR WITHOUT STAND

Make this knife box of pine or maple and use it for fruit or attach it to the stand and carry it here and there with books or mending. The stand has handy pull-out shelves. Both pieces are made with pattern 281 which will be mailed for 35c. This pattern is one of five in the Packet of Reproductions of Pine and Maple Antiques for \$1.50.

Braided rag rug

A BRAIDED RAG RUG WITH THE FAMILY

The original of the oval braided rag rug shown above was known as "The Rag That Grew Up with the Family". When first used it was scarcely large enough for a table for two. It grew a little at a time. It was planned to be 10 feet long and eight wide. The first or center row was, therefore, made two feet long or the difference between the length and width of the finished rug to be. In the early stages it was rather long and narrow but each winter it grew until it reached the planned size. Space is not available here to tell you of the vast deal of rug-making lore contained in the pattern used for making this rug, so we suggest that readers send 35c for a copy which may be returned for refund if not found abundantly useful.

(These are not necessarily the views of the editor of this paper.)

Solving our wheat crisis

(From The News-Optimist, North Battleford, Sask.—Aug. 15, 1956)

Western Canada will in all probability face a new economic crisis this fall. Nature has been kind to the prairie grain farmer and another bumper crop will produce tremendous problem of grain storage and of grain sales.

There is no single answer which will clear all our problems, but a little realistic thinking by federal government officials could secure the economic future of western farmers and at the same time would strengthen the entire agrarian outlook throughout Canada.

There are two steps which could produce at least a partial answer to the grain farmer's plight. In the first place, some method of adequate grain storage throughout the prairie area must be undertaken. Secondly, if prices of other commodities such as steel, newsprint, farm machinery, are to be continually increased in an inflationary air, then it is essential that our farmers who consume such goods must be protected to an extent at least. Some basis of parity prices at home is only fair.

The News-Optimist proposes simply this: an adequate grain storage system and the payment of parity prices for agricultural goods sold on home markets would give our farm population some real protection in an age when every other industry has such protection through tariff walls. This is not an age of free trade. If it were our farmers could buy their farm machinery and other commodities at much lower prices on the world market where they must at the present time sell their wheat.

Last year many hundreds of thousands of bushels of the world's finest wheat were lost because grain elevators could not afford to build proper storage facilities. An adequate government owned series of terminal storage elevators could have prevented this tremendous waste. But no action was taken last year, and action at this time could hardly aid the farmer with this year's bumper crop. We must work, however, for the future. A series of terminal elevators should be undertaken immediately so the grain waste will not continue to rob prairie farmers.

Parity prices would give Canadian agriculture a tremendous lift. Industrial workers since the war have been able to increase their standard of living in relation to the farmer because they have not only increased their efficiency, but because they have been protected by a tariff barrier. The farmer has no such protection. He must compete with the world.

We are told that about 20 per cent of the wheat produced in Canada is consumed here. If a parity price were paid for grain consumed by Canadians it would in effect mean an overall increase of about 12 cents per bushel on every bushel of wheat produced by the nation's farmers. This new income, as many producers would give the entire economy a boost and would provide some long term stability to the agricultural scene—something that has not been apparent for many years.

We cannot allow only part of our nation to be prosperous. A sound agricultural economy is of fundamental importance to the entire nation. To achieve such a goal an adequate terminal grain storage program must be constructed. With the prosperity that Canadians are enjoying generally surely they could easily afford to pay a parity price for the wheat they consume.

Youth and age

(From The Virden Empire-Advance, Virden, Man.—Aug. 15, 1956)

A mark of a civilized community is the attitude of its people to youth and old age. Primitive peoples tend to let their children run relatively wild and to permit their old folk to die without care. As civilization develops, a more cultured people assumes increasing responsibility for both the young and the old of the tribe. Children receive the training and supervision they need to prepare them for life while senior citizens have the respect and care and attention that is their right.

As far as youth of the community is concerned Virden has reached a high degree of civilization. Education and recreation are provided through the schools, the churches, and various organizations.

But what about older people who have contributed their share during their more active years to the development of the community? What are we doing for them?

Through the years many older people, no longer able to care for themselves, have had to leave Virden for here we have no home where senior citizens may receive the care they need. They have had to live the sunset of their lives among strangers, far distant, in many cases, from their relatives and friends.

If we are to consider ourselves truly civilized, is it not time we were giving serious consideration to the establishment of a senior citizens home here as a community project? Such a home would provide a haven for the men and women who need professional care in their declining years yet permit them to keep in close touch with the community in which they have lived their lives and where their friends are.

Costs of such a home would not be excessive, particularly since it is possible to obtain grants from the Manitoba government to assist with the erection and furnishing of a suitable building. A home of this nature, as is the case elsewhere, would be self-supporting in the main.

Could not the churches of the town co-operate in getting a senior citizens' home project under way?

Sunset years when a person is no longer caught up in the rush of making a living and a home can be rather lonely years. We think that Virden needs a 65-and-over club where senior citizens could gather for recreation with people of their own age, where they could share their hobbies and interests and could enjoy social times together.

Such a club would be most welcome, we believe, and would flourish once it was started. Could not one of the existing organizations in town provide leadership in instituting a club for senior citizens?

Young people are vastly important for upon them depends the future of our community and our nation. But older people are important, too, and certainly merit more attention than they have been receiving as a group in Virden.

SEAWAY HALF DONE

The St. Lawrence Seaway project on Aug. 10 entered the halfway mark between its start two years ago and the proposed finish in August, 1958.

Project director Gordon Mitchell said 4,100 workers now are engaged in the 1,640,000-kilowatt power project being undertaken by the Ontario Hydroelectric Power Commission. The Power Authority of the State of New York is tackling the United States end of the job.

The face of the St. Lawrence area has visibly changed since the undertaking began. The north channel of the St. 2½-mile stretch sealed off by cofferdams.

To date 380,000 tons of concrete have been poured for the powerhouse structure. More than 1,500,000 cubic yards of earth have been taken from the river bed. The seaway end of the project at the Lawrence river was diverted through a channel south of Barnhart Island. Some 650,000,000 gallons of water were drained from a scheduled to be ready for shipping in 1957.

Many houses have been moved from the area to be flooded. Two new towns have been established. Despite some setbacks in weather, Mr. Mitchell said, nearly all phases of the project are on schedule.

IRISH LAKES BOUGHT

The beautiful lakes of Killarney, hailed in many a minstrel's ballad, have been sold at auction to the state by one who vows he has true respect for the traditions of Erin.

J. J. Ryan, Robertson of Bona Fide, purchased the famous Irish scenic spot owned by the Kemmure family under a grant issued by Queen Elizabeth I some 400 years ago. Trustees for the late seventh earl handled the transaction.

The late earl's granddaughter, Mrs. Beatrice Grosvenor, put the lakes up for sale when she found the British wanted £70,000 (£196,000) inheritance duty on the estate which includes properties in both the Republic of Ireland and England.

The purchase price was not divulged, but it was reported Mrs. Grosvenor was asking £100,000. She has retained a portion of the land to build a home for herself.

Mr. Robertson told reporters in Bona Fide his purchase includes the Lower and Middle Killarney Lakes, plus some 3,200 acres of "beautiful rolling countryside."

The townfolk of Killarney took the purchase announcement in good spirit. And they brightened perceptibly when told Mr. Robertson's father, who was born near Glasgow, had moved to County Killarney, Ireland, in his youth.

PRINCIPAL USERS OF QUICKLINE

There were 995,639 tons of iron ore shipped by Canadian producers in 1955, of which 228,640 tons were in pulp and paper mills, 88,567 in iron and steel furnaces, 65,632 as mason's lime, 20,156 in non-ferrous smelters, 19,850 as finishing lime and 19,968 in glass works.

Where the bromo-alcalifur crop seeded last year is not making the growth expected, attention is warranted. If the disappointing stand is due to a poor patch, reseeding will help; if low fertility is the cause, fertilizer use is indicated.

Unless the soil is dry, reseeding may be done anytime from the present until September 1, advises D. R. Walker, soils specialist at the Lacombe experimental farm. If seeding is not done before that date, delay it until the spring thaw wakes them to an early start, the danger of winter kill will be avoided. For general use on the black soils of Alberta a bromo-alcalifur mixture seeded at the rate of 3 lbs. alcalifur to 7 lbs. bromo per acre is recommended.

If a good catch followed seeding but succeeding growth was poor, a combination of the dry spring of 1956 and low fertility was likely the cause. Fertilizer application may be needed here, says Mr. Walker—either as commercial fertilizer or barnyard manure. On sandy soils the recommended commercial fertilizer in the black soil zone is 100 to 200 lbs. per acre of ammonium phosphate 16-20-0. On the heavier loam soils of the area 50 to 150 lbs. of 11-48-0 or 100 to 200 lbs. of 16-20-0 may be used.

Fertilizer may be applied in spring or fall depending on the labour situation and susceptibility of the land to spring flooding.

PRAIRIE RUST CONDITIONS

Cereal rust infection was lighter in the Prairie provinces this year than for many years past in spite of the fact that weather conditions were nearly ideal for the spread of rust during much of the summer. The report of the Winnipeg Plant Pathology Laboratory, Canada Department of Agriculture issued August 21 states that there were two chief reasons for the favorable situation. The first was the scarcity of air-borne spores from the south. The second was the presence of large acreages of rust resistant wheat and oats in Manitoba, eastern Saskatchewan and adjoining areas in the United States. Despite the small number of rust spores blown in from the south there was considerable development of stem rust and leaf rust on late stands of susceptible wheat and oats in August and some areas. The later stands of wild oats are by now rather heavily infected with stem rust and late-sown experimental plots of susceptible wheat varieties in Manitoba are becoming rather heavily rusted. The conditions have not been seen in farmers' fields where freedom from rust in late-sown fields is due more to the resistance of the varieties grown than to absence of rust.

There is little knowledge as yet of the rust races present but race identifications and observation of varietal reaction in the field indicate that races 13B and 56 make up much of the wheat stem rust and that races 2 and 7 are the most prevalent oat stem rust races. 3214

TRY AND STOP ME!

By BENNETT CHAP

Two wealthy Chinese merchants of San Francisco were invited to spend a day at a country club outside Berkeley, Calif., for the first time, a couple of duffers trying to back their way out of a sand trap.

"Wouldn't you think," observed Ah Sing, "that men as rich as this could get servants to perform such arduous and unpleasant labor for them?"

A gent who was a champion in the gentle art of getting into arguments, began expounding a position with increasing passion to a stranger next to him in the clubhouse of the Santa Fe Club. The stranger remained disturbingly uninterested.

The arguer hollered, "Don't you understand what I'm driving at? It's as simple as A-B-C."

"Could be," replied the stranger calmly, "but I am D-E-F."

A kindly warden summoned a long-term prisoner and said, "Joe, frankly, you've got me concerned. You're the only one here who hasn't had a visitor this year. Haven't you any relative who cares about you?"

"I got lots of 'em, Warden," maintained the prisoner, "but all of 'em's right in here for longer stretches than me!"

A husband put a dime in a fortune-telling machine and was delighted when a card dropped out reading, "You are handsome, dynamic, irresistible to the opposite sex, and destined to wind up wealthy." The wife, however, was unimpressed. Her comment was, "It's got your age and weight wrong, too."

No tears now in onion-peeling

Now it's possible to peel an onion without producing tears.

But it's not likely the solution to this age-old domestic difficulty is going to be of much direct help to the average housewife, because this particular method of paring the pungent vegetable applies only to a new assembly-line technique developed for a major canning concern.

The secret of the new method is a gas-operated heating system set just right so that the onion's indigestible peel is softened on the onion as it moves along the lines, according to the Gas Appliance Manufacturers' Association. Because of its thin outer layer, the onion is not adaptable previously to peeling with existing mechanical equipment.

Gas heat engineers conducted intensive research before perfecting the method because too much heat would oxidize the flesh, too little would fail to remove the outer coating.

Because the homemaker gets a break because the new process enables the canner to cut his production costs and conserve food, thereby saving the ultimate price of canned onions to the consumer.

NEW ANGLING "HOT SPOT"—Lac la Plonge, in northwestern Saskatchewan, is rapidly gaining recognition as a favorite angling area with Saskatchewan and American sport-fishermen. Here, Hal Rutton of Des Moines, Iowa (centre), is shown with a 23-pound lake trout he landed recently at Lac la Plonge.

Lac la Plonge newest angling spot

They're raving about Lac la Plonge, five miles east of Beauval and 100 miles north-northwest of Meadow Lake, in northwestern Saskatchewan.

And no wonder, R. E. Callaway, a discerning angler from Shelby, Missouri, hooked a 38-pound great northern pike there on June 28. It's believed to be the biggest northern caught in the province this year and a sure bet to win the Saskatchewan Anglers' Derby.

Hal Rutton, of Des Moines, Iowa, is another satisfied Lac la Plonge man. He recently landed a 28-pound lake trout, while trolling the crystal-clear waters of the lake with deep-sea tackle.

Twenty-pound northern pike and trout are not uncommon in the 100-square-mile lake, which probably explains its skyrocketing popularity with both Saskatchewan and American sport fishermen.

This is the lake's second season and already some 1,500 anglers have visited the resort to date this year. The lake was made readily accessible to sport fishermen last fall, when the provincial natural resources department's construction branch pushed through the Green Lake-Beauval section of the Buffalo Narrows road.

The department is currently building a road from the settlement to the lake to replace an old trail tourists have been using.

W. E. "Bill" Sandherr, local tourist camp operator, thinks a midsummer family resort could be established on the sandy north shore of the lake and he may start on one next year. It would feature fishing, boating and swimming.

Sandherr's Lac la Plonge Log Cabin is the only outfitting and accommodation camp on the lake at present, and it's set up primarily for sport fishermen.

Sandherr believes the local sportfishing industry could be extended to the Beaver River, which flows by Beauval in a north-south direction and which he claims has "terrific pickerel fishing."

In time, he would like to set up sport fishing camps on Lac la Plonge and on the Beaver River.

Helpful hints on painting

For best results, buy and use the best paint available. In the long run a top quality paint will save you money.

Mix the paint well before using. Stir it thoroughly from the bottom of the can and pour it from one can into another several times.

Be sure the surface you want to paint is thoroughly clean and dry. Before painting over a glossy surface, rub with fine sandpaper or steel wool. Then remove dust. This "roughs-up" the surface so that the new coat will adhere smoothly.

Choose a good day for painting. When painting outside, avoid days when hot sun could blister the paint as it dries. Allow plenty of drying time between coats.

When painting wood surfaces, be sure to brush the paint thoroughly into the wood. Smooth the lap marks out with the brush as you progress. Try to complete your painting job without stopping, to avoid an uneven finish.

With any paint product, two thin coats are more desirable than one thick one.

If you are in doubt about the proper finish for any particular painting jobs, consult your dealer.

See level glaciers. We are accustomed to thinking of glaciers as formations that are found only in high and remote mountain ranges, but the Book of Knowledge points out that the further we go into the cold north, the lower down does the ice creep. Hence, around the Pole and in Alaska and Greenland and parts of the Arctic, there are glaciers at sea level.

Improving the forage stand

(From The Globe, Lacombe, Alta.—Aug. 2, 1956)

Where the bromo-alcalifur crop seeded last year is not making the growth expected, attention is warranted. If the disappointing stand is due to a poor patch, reseeding will help; if low fertility is the cause, fertilizer use is indicated.

Unless the soil is dry, reseeding may be done anytime from the present until September 1, advises D. R. Walker, soils specialist at the Lacombe experimental farm. If seeding is not done before that date, delay it until the spring thaw wakes them to an early start, the danger of winter kill will be avoided. For general use on the black soils of Alberta a bromo-alcalifur mixture seeded at the rate of 3 lbs. alcalifur to 7 lbs. bromo per acre is recommended.

If a good catch followed seeding but succeeding growth was poor, a combination of the dry spring of 1956 and low fertility was likely the cause. Fertilizer application may be needed here, says Mr. Walker—either as commercial fertilizer or barnyard manure. On sandy soils the recommended commercial fertilizer in the black soil zone is 100 to 200 lbs. per acre of ammonium phosphate 16-20-0. On the heavier loam soils of the area 50 to 150 lbs. of 11-48-0 or 100 to 200 lbs. of 16-20-0 may be used.

Fertilizer may be applied in spring or fall depending on the labour situation and susceptibility of the land to spring flooding.

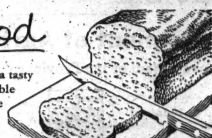

PRAIRIE RUST CONDITIONS

Cereal rust infection was lighter in the Prairie provinces this year than for many years past in spite of the fact that weather conditions were nearly ideal for the spread of rust during much of the summer. The report of the Winnipeg Plant Pathology Laboratory, Canada Department of Agriculture issued August 21 states that there were two chief reasons for the favorable situation. So good

Here's bread with a tasty difference! Dependable Fleischmann's Active Dry Yeast makes it quick and easy!

Rolled-out Bread

1. Measure into bowl:
1 cup rolled oats
2 teaspoons salt
1½ tablespoons shortening
Stir in
1½ cups boiling water
and let stand until lukewarm.
2. In the meantime, measure into a large bowl:
½ cup lukewarm water
2 teaspoons granulated sugar
and stir until sugar is dissolved. Sprinkle with contents of:
2 envelopes Fleischmann's Active Dry Yeast
Let stand 10 minutes, THEN stir well.
Stir in prepared rolled-oat mixture and
- ¾ cup lightly-packed brown sugar
2 tablespoons molasses
2 cups once-sifted all-purpose flour
and beat until smooth and elastic. Work in an additional 2½ cups (about) once-sifted all-purpose flour.
3. Turn out on lightly-floured board and knead until smooth and elastic; place in greased bowl. Brush top of dough with melted shortening. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1 hour.
4. Punch down dough. Turn out and divide in half. Let rest 15 minutes, then shape each half into a loaf. Place in greased loaf pans (8½ x 4½ inches, top inside measure). Brush with melted butter, margarine or shortening. Cover. Let rise until doubled in bulk—about 45 minutes. Bake in moderately hot oven, 375°, about 50 minutes. Yield, 2 loaves.

Government of the Province of Alberta

Announces the Eighth Annual

Master Farm Family Award

For 1956 to the following

Alfred George Rose John P. Rozmahel
Ricinus Viking

A. D. Frazer Wilfred L. McGillivray
Teepee Creek Coaldale

The Master Farm Family Award is recognized by an award of \$1000.00, an engraved plaque and a name plate for the farm entrance. The purpose of the Master Farm program is to find and honour those who have achieved notable progress in farming, home-making and citizenship, and who, by their example, are encouraging interest in farming as a way of life. The Department of Agriculture is indeed proud and gratified with the high standard of attainment among the farm citizens of Alberta as revealed by the Master Farm Family Program.

Department of Agriculture

Government of the Province of Alberta

Hon. L. C. Halmrast
Minister

R. M. Putnam
Deputy Minister

It takes
money to
make good
gasoline

Gasoline quality has risen
tremendously in the past
few years. Two gallons of
today's gasoline do the work
of three in the '20s.

Finding new techniques to
make these improved
gasolines, and new equipment
to put these techniques
to work, has cost
a lot of money.

Imperial, with by far
Canada's most extensive
oil research facilities, has
spent 20 million dollars
over the past ten years
on research alone.

Imperial spent 65 million
in the same period
directly on new equipment to
improve gasoline quality.

It's costing more and more
money to make the
gasolines required by
today's more powerful cars.

IMPERIAL OIL LIMITED

The Irma W.I. will sponsor a tag day for the CNIB during the month of October.

The Irma United Church will hold its Harvest Thanksgiving service on Sunday, October 7.

At a recent meeting of St. Mary's W.A., it was decided to hold a Sale of Home Cooking and Farm Produce on Saturday, December 8.

Irma folk were deeply saddened when Mr. Sivert Nilson passed away on Friday last at the University hospital. Mr. Nilson's pleasant disposition and many sterling qualities made him an outstanding member of our community. He was always ready to help a neighbor or to take a leading part in church and community life. This Christian gentleman will be sadly missed and our deepest sympathy goes out to Mrs. Nilson and Erling and Lilly (Mrs. R. Erickson) in their sad loss. Funeral services were held from Sharon Lutheran church on Oct. 2. Full obituary next week.

ATTENTION boys and boys! Irma 4H Beef Club will be re-organized soon. Watch for date of first meeting some time near the last of October. Get your calves in before the first of November as no new members will be accepted after that date. Plans for the year's program will be made at the first meeting starting with a bus tour.

Mrs. Dyck and family (the former Almings Hill) are visiting here at the F. M. Hill home.

Miss Joan Nissen of Calgary is at Irma with her parents, Mr. and Mrs. H. C. Nissen.

Mrs. Lamont is convalescing at the home of her sister, Mrs. H. L. Black after spending two weeks in the Wainwright hospital.

Mrs. Hutchinson of Vermilion is visiting here at the home of her sister Mrs. V. Torrance.

The Ross Miller family have left Irma to make a new home in Wainwright.

Mrs. Martin Knudson spent several days in hospital with an infected finger. We are glad to know that she is home again.

Born to Mr. and Mrs. Chester Bartholow, the former Isabel Jackson, at Olds hospital on September 4, a son, Norman Chester, wt. 6 lbs. 11 oz.

The L.O.B.A. is sponsoring a Halloween dance in the North Irma community hall on Nov. 2. Weather permitting. All members please bring lunch. Watch for further posters.

Laraine Pond and Marion Darling are delegates from the Irma C.G.I.T. to attend Provincial Conference at Olds.

Mr. and Mrs. J. B. Burch who lived in Mannville in the early days—Mr. Burch started store-keeping there in 1903—are celebrating their Golden Wedding anniversary on October 10. These beloved old timers have many friends in this district and

Kinsella News

Mrs. H. F. Powers of Hermiston, Oregon, was visiting her brother and sister-in-law, Mr. and Mrs. Wm. Boyd for ten days and has now returned to her home in Oregon.

Mr. and Mrs. George Paterson have returned from their trip to the coast.

Threshing and combining has started in this district and we all hope for a good spell of fine weather to finish the job.

Mr. and Mrs. Fraser Arkinstall and Mr. and Mrs. Kenneth Arkinstall of Edmonton were Sunday visitors at the home of their parents, Mr. and Mrs. R. Arkinstall.

Mr. and Mrs. G. Hoppe and family of Viking were week-end visitors at the home of Mr. and Mrs. P. Mollier.

Pamela Lancaster spent the week-end with her friend Faye Olsenberg and Billy Lancaster at the home of his friend Jamie Barker.

A number of relatives and friends were entertained at a turkey dinner at the home of Mr. and Mrs. Wm. Greenwood on Sunday the 23rd in honor of Mr. and Mrs. J. Foster of Alexandria, Ont., who were recently married.

At the W.I. meeting on Saturday, about twenty attended. A donation was given to the Blind and it was arranged to have a Halloween party for the children of the community on Oct. 27. Mrs. C. Lancaster gave a book review, which contained much of interest to institute members as some of the books were histories of the W.I. supplied by the U. of A. Hostesses were Mrs. G. Paterson and Mrs. C. Lancaster.

Mr. and Mrs. K. Overbo and son Edward motored to Edmonton last week. Edward remained in the city where he will continue his studies at the university.

Rally Day was held in the Kinsella United Church on Sunday the 30th and children of the Sunday School took a prominent part in the service. The W.A. will meet on Thursday at 2:30 in the church.

for their benefit we are giving Mr. and Mrs. Burch's address, 10705-84 Ave, Edmonton. Your humble scribe is happily employed this week decorating the golden wedding cake. Her father, Mr. J. F. Reeves, of Mannville, decorated the wedding cake 50 years ago.

Guests at the R. O. Larson home last week-end included Mr. and Mrs. J. D. Elliott, Mr. and Mrs. David E. Elliott, Mr. and Mrs. Joe Chambers, Mr. and Mrs. Bernard Davies and baby Glenn, all of Edmonton, Mr. and Mrs. Wm. Revell of Kinsella, Mr. and Mrs. Debs Faulkner of Minburn and Mr. and Mrs. Chris Ensland of Vermilion.
